

# Khoury Industries... Your Only Thermal Solution!

WE DESIGN AND MANUFACTURE TEST SYSTEMS AND FIXTURES FOR A WIDE VARIETY OF APPLICATIONS AT TEMPERATURE RANGES OF -80C TO +225C

Khoury Industries is the Manufacturer of the industry-leading Khoury Box, a temperature-measuring device used to ensure the reliability of

industrial and electronic products through prolonged exposure to extreme conditions. The device-under-test is put through rigid thermal cycling, and relies on precise electronics and engineering designs. Don't just trust anyone – trust Khoury Industries to deliver the best for your thermal testing.

All Thermal Test Fixtures are ESD-Free and/or EMI Shielded, and most systems are available with European CE standards. Our systems provide an electrical noise-free, moisture free environment. The Khoury Box boasts 50 ohm impedance-matched connections and shielded signal paths used in the tester interface which provide clear, accurate signals between the tester and the device-under-test.

Let us help you find the solution to:

- Fast Temperature Cycle
- Thermal Test Screening
- Temp. Characterization
- Failure Analysis
- Thermal Shock
- Thermal Inducing
- Life Testing
- Thermal Cycling
- Temperature Characterization
- And More!
